

Cover Letter

Dear Hiring Team,

I am excited to apply for the Product Support Engineer position at Akamai.

With more than 25 years of experience in Information Technology and over a decade supporting mission-critical enterprise environments, I have built my career around solving complex technical problems, supporting high-availability platforms, and helping customers achieve operational excellence.

Most recently, I worked as a Senior Oracle Database Engineer and Principal Engineer, providing advanced technical support for global enterprise customers. My responsibilities included handling critical L3/L4 escalations, performing root cause analysis (RCA), troubleshooting complex production issues, optimizing performance, developing automation using Python and Shell scripting, and collaborating with engineering teams to resolve product-related challenges.

Throughout my career, I have worked extensively with Linux, cloud platforms (OCI, AWS and Azure), virtualization technologies, networking concepts, automation, Kubernetes, Infrastructure as Code, and enterprise security best practices. I enjoy investigating complex issues, creating automation to simplify operations, and producing technical documentation that helps both customers and engineering teams.

One aspect that defines my professional profile is my passion for continuous learning and knowledge sharing. I have personally developed several interactive technical platforms covering Oracle Database, Exadata, Data Guard, OpenShift, Cloud and Database Administration to help engineers and database professionals improve their technical skills.

What attracts me most to Akamai is the opportunity to work with cutting-edge cloud and security technologies while contributing to a world-class engineering organization focused on innovation, customer success and technical excellence.

I am confident that my experience supporting enterprise environments, my analytical mindset, and my commitment to solving complex technical challenges would allow me to contribute positively to your Product Support Engineering team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background and experience can contribute to Akamai's continued success.

Kind regards,

Renato Barros

Senior Oracle Database Engineer | DBRE | OCI | Exadata | Performance Tuning | Automation | SRE
